

The Importance of

Professional Grooming for your PUPPY

Establishing good grooming habits are essential for all dogs and especially young puppies. It is never too soon to have your puppy professionally groomed. By starting your puppy at a young age, you are setting the tone for years to come. A kind and gentle groomer who uses dog friendly techniques will make your puppy's experience enjoyable and relaxing.

Take advantage of our **PUPPY GROOMING SPECIAL**

For puppies under five months of age which includes:

- Tearless shampoo and conditioner & gentle blow dry
- Nail trimming, introduction to the dremel, and ear cleaning
- Soothing brush out and light style
- Overall assessment for future grooming

FOR ONLY \$25!

The benefits of professionally grooming your puppy are endless, here are just a few:

- Puppies do not take long to groom, therefore he will only be away from you for a short time. If done on a regular basis, it will be easier for him to adjust to being left for longer periods of time in the future.
- He will become used to light manipulation especially when cleaning ears, teeth, and clipping nails. Adult dogs can have a very difficult time with these simple (but necessary) tasks if they are not introduced and done regularly at an early age.
- He will quickly become used to being bathed and blow dried and enjoy being brushed and trimmed if he is slowly introduced over the course of time. When you wait until it is necessary, it can create a stressful environment for a dog that has never been exposed to new/strange noises and sensations.
